SUMMARY

- Web Developer with 3 years of experience, specializing in creating compelling user interfaces utilizing **JavaScript, HTML, CSS, React, Next.js, and WordPress**.
- Coded 17 major websites by transforming high-fidelity designs into fully functional, scalable web platforms using frontend and backend technologies WordPress REST API, **Python/Django**, PHP/Laravel.
- Enhanced Website Performance: Achieved an 80% reduction in load times by strategically upgrading technology and refining coding practices, resulting in smoother user experiences.
- Increased web traffic by 50 percent through SEO enhancements and technical optimization.
- Engineered a WordPress dashboard plugin featuring a profile system with over a hundred detailed, customizable input fields tailored for music students and educators.

PROFESSIONAL EXPERIENCE

Web Developer

11/2021 – 12/2023

Blackmore Music Group

Berlin, Germany

- Developed 10 web projects, including 4 event ticketing and workshop registration sites utilizing WooCommerce, 1 educational portal, and 5 personal websites for artists, leveraging **JavaScript, HTML, CSS, WordPress, React, and Next.js**
- Redesigned back-end systems with WordPress for 3 projects, enhancing system stability and reducing average server response times from 1100ms to 600ms.
- Launched a bilingual event website with registration functionality under a tight one-week deadline. Engineered a form, processing 50 daily registrations.
- Constructed a **WordPress** dashboard for an educational portal, integrating databases for schools and professionals. Facilitated user-driven content management, including personal and company profiles, job applications, and class registrations.
- Revamped internal and external optimizations to the site, enhancing **SEO** practices and streamlining performance features, which led to a 50% increase in web traffic and improved user engagement metrics.

Front-end Developer

05/2020 – 08/2021

CreativeMade

Moscow, Russia

- Engineered 7 diverse web pages from Figma designs, utilizing semantic **HTML** markup, efficient **CSS** methodologies, and optimized **JavaScript** to ensure pixel-perfect, cross-browser compatibility and enhanced user experience
- Built a WordPress website with advanced animations and UI elements, optimizing performance to achieve a **95+ PageSpeed Insights score** on both mobile and desktop.
- Spearheaded the optimization of high-performance landing pages, using advanced **JavaScript** and **jQuery**, which doubled client engagement and increased conversion rates by 25%.
- Streamlined front-end interactivity by integrating **WordPress APIs**, reducing page load times by 30% and increasing user session duration by 25%.
